

Vaccine clinics & outreach campaigns

Effective March 1st, the Wisconsin Department of Health Services (DHS) expanded vaccine eligibility to new groups. Please click [here](#) for current vaccine eligibility. Madison Medical Affiliates & Ascension continue to prioritize our patients ages 65 and up. We do not anticipate completing this age group for a few more weeks. As a result, any newly eligible patients as of March 1st looking to be vaccinated should be directed to the MMA consumer website where they can complete a form to be added to our vaccine waitlist. Once we have completed our 65+ population, we will begin contacting those eligible individuals on the waitlist. Please continue to assist our 65+ population by connecting them with a vaccine site. As a reminder, here are the available vaccine clinics:
